

Advantages of the Mach LED 150

Conventional light systems

Dr. Mach light system

Light quality and optics

Superiour colour rendition

With colour rendering indexes R_a above 95 and R_g (red) above 90 the surgeon recognizes clearly the tiniest nuances of colour in tissue. The colour rendering index is $R_a \geq 95$. For recognizing the exact colour spectrum of the wound the exact rendition of the red colour range is essential. R_g (red) ≥ 90 means for the surgeon a visibly better recognition of details. The colour spectrum of the wound is rendered naturally with rich contrast. The OT-light clearly provides welcome relief for your eyes.

Mach LED 150 OT-light

Facetted multi-lens system

A multitude of computer-calculated facetted lenses guarantees homogeneity and lowest shadiness in the light field. Separately arranged optical systems, with one LED module, generate their own light field, which increases the contrast effect of the OT-light. Light intensities of 100.000 Lux can be attained without difficulty.

Focussing (optional)

The light field can be focused by turning the handle. The focussable light beam allows a punctual illumination of deepest wound channels with light intensity and an exact matching of the light field diameter with the size of the wound field.

Additional comfort

Cool light

The LED technology is much more effective than conventional light sources such as halogen bulbs. The heat radiation is reduced to a minimum without using any expensive filter technique. The temperature increase in the surgeon's head area is almost nonexistent.

Flow properties

During development high attention was paid to the performance of the new LED OT-lights in laminar-flow ceiling systems.

Mach LED 150

Small operating light system with LED technology

Mach LED 150 small operating light

Mach LED 150 F/LED 150
100.000 Lux / 80.000 Lux

Handy small operating light
with the optional advantage
of focussing

Mach LED 150 with ceiling fixation

Mach LED 150 with wall fixation

Mach LED 150 mobile with four castors

Performance description

Mach LED 150

Superior colour rendition

Facetted multi-lens system

Cool light

Optimum flow properties

Easy maintenance

Mach LED 150 F

Additionally to the advantages
of the Mach LED 150:

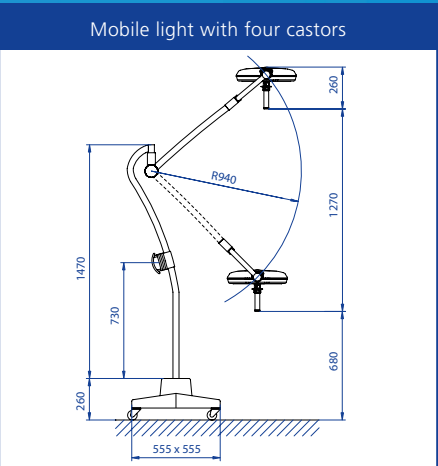

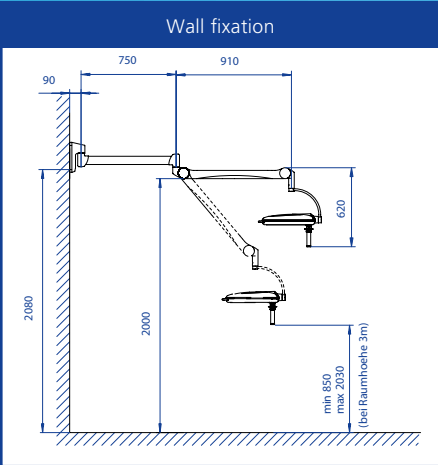

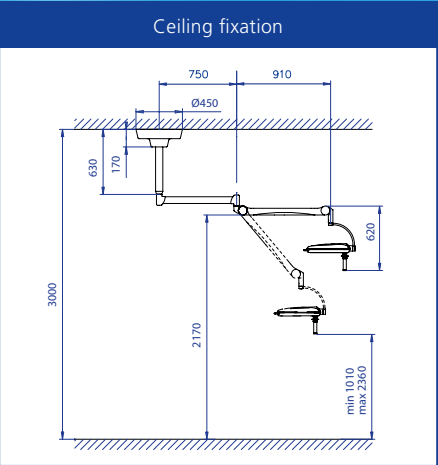

Focussing

Handling

2 functions
via
touch panel:

- on/off
- light intensity control

Dimensions in millimeter

Technical Data		
Mach LED 150 light system ⁽¹⁾	Mach LED 150 F ⁽²⁾	Mach LED 150 ⁽³⁾
Light intensity in Lux at 1 meter distance	100.000	80.000
Colour rendering index R _a ⁽⁴⁾	≥ 95	≥ 95
Colour rendering index R ₉ ⁽⁵⁾	≥ 90	≥ 90
Focussable light field size (in cm)	14 - 25	17 (fixed focus)
Colour temperature (Kelvin)	4300	4300
Electronic light intensity control at the lamphead	50 - 100%	50 - 100%
Temperature increase in the head area	0,5° C	0,5° C
Total power consumption	35 W	35 W
Light source LED	24	24
Diameter of light head (in cm)	38	38
Working distance (in cm)	70 - 140	70 - 140
Height adjustment (in cm)	118	118

(1) external power supply
(2) F-models with focussing
(3) models with fixed focus
(4) R_a is an average of R₁ = burnt pink, R₂ = mustard yellow, R₃ = yellow green, R₄ = light green, R₅ = turquoise blue, R₆ = skyviolet, R₇ = violet, R₈ = lilac. Maximum value = 100.
(5) R₉ is the value for the rendering of the colour red. This is not used in calculating the general colour rendering index R_a. The values for conventional operating lights are between 20 and 70. Maximum value = 100. Values of more than 90 allow the surgeon to recognise details better in the wound area.
